PART I · CHAPTER 1 · LEAVE-BEHIND

The Old Playbook Is Dead

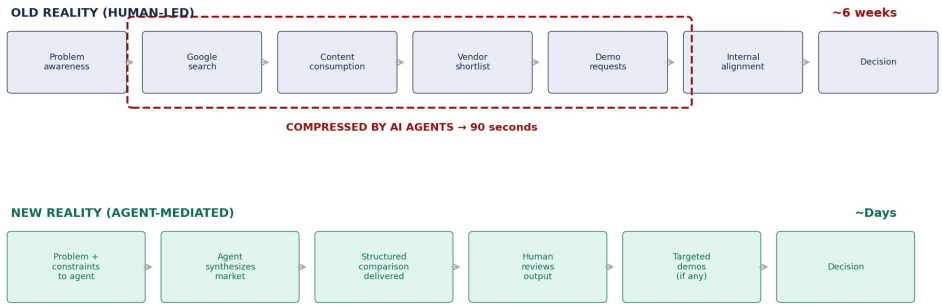
Pragmatic Remix: All 37 Boxes (Reframed)

CORE THESIS

The agentic era didn't accelerate the old B2B playbook — it ended it. Product lifecycles run in continuous deployment. Buyers consume content through AI intermediaries. GEO has replaced SEO. The PMM who survives is not the one who prompts faster — it's the one who understood what changed.

The Buyer Journey Compression

THE BUYER JOURNEY COMPRESSION



Steps 2–4 of the old journey — where most PMM content lived — now happen inside an AI's context window in seconds.

Steps 2–4 of the old journey — where most PMM content lived — now happen inside an AI's context window in seconds.

The Visibility Gap

THE VISIBILITY GAP

What AI agents surface vs. what most PMM teams produce

WHAT AGENTS CAN PROCESS	WHAT AGENTS SKIP
✓ Structured comparison data (schema.org)	✗ Narrative product pages
✓ Third-party review rankings (G2, Capterra)	✗ Video testimonials & demos
✓ Technical documentation & APIs	✗ Gated PDF case studies & ebooks
✓ Machine-readable pricing structures	✗ JavaScript-rendered content
✓ News with verifiable citations	✗ Email nurture sequences

The Visibility Gap is not a technology problem — it is a prioritization problem.

What AI agents can process vs. what they skip. The Visibility Gap is not a technology problem — it's a prioritization problem.

From SEO to GEO

FROM SEO TO GEO

Generative Engine Optimization

	SEO	→	GEO
Optimize for	Ranking on a list		**Citation in a synthesis**
Compete on	Keywords		**Entity authority**
Build	Backlinks		**Structured proof points**
What matters	Title tag		**Schema markup**
Volume effect	More content helps		**Better structure helps**
Buyer sees	Blue links		**Synthesized answer**

SEO optimizes for ranking. GEO optimizes for citation in synthesized answers.

THE AUDIT (DO THIS WEEK)

Open Claude, ChatGPT, or Perplexity. Ask it to evaluate vendors in your category. See if your company appears. That 60-second exercise tells you more about your GEO readiness than any consultant's report.

The New Awareness Stack

THE NEW AWARENESS STACK

01 GEO LAYER
Technical discoverability
Schema.org markup • Structured data • Machine-readable pricing • FAQ pages mapped to buyer queries

02 DATA LAYER
Third-party validation
G2 • Gartner Peer Insights • Capterra • Treat review management with analyst relations rigor

03 NARRATIVE LAYER
Irreplaceable human work
Category creation • Competitive differentiation • Executive thought leadership • Event keynotes

Three layers: GEO (technical discoverability), Data (third-party validation), Narrative (irreplaceable human work).

The Tiered Launch Model

THE TIERED LAUNCH MODEL

TIER 1 **Strategic moment**	**~2x/year**	Full positioning refresh, analyst briefing, press, keynote, demand gen, sales enablement
TIER 2 **Feature story**	**Monthly**	Blog post, demo update, sales talking points, social push, comparison page update
TIER 3 **Continuous stream**	**Always**	Structured changelog (human + agent readable), competitive cadence proof

Strategic moments (~2x/year) + Feature stories (monthly) + Continuous stream (always).

The Pragmatic 37 → Agentic Funnel Map

THE PRAGMATIC 37 → AGENTIC FUNNEL MAP

How 37 product marketing activities snap to the modern B2B funnel

AWARENESS TOFU	Market Problems	Market Definition	Positioning	Awareness
	Marketing Plan	Events	Launch	Content
CONSIDERATION MOFU	Competitive Landscape	Distinctive Comp.	Buyer Personas	Buyer Experience
	Use Scenarios	Nurturing	Content	Programs
DECISION BOFU	Win/Loss Analysis	Pricing	Distribution Strategy	Sales Alignment
	Sales Tools	Channel Training	Revenue Growth	Business Plan
ONBOARDING Post-sale	User Personas	Requirements	Channels	Operations
	Buy/Build/Partner	Stakeholder Comm.		
RETENTION NRR	Revenue Retention	Product Profitability	Product Portfolio	Product Roadmap
	Innovation	Asset Assessment	Measurement	
ADVOCACY Flywheel	Advocacy	Events	Nurturing	Win/Loss Analysis
	Measurement			

Market • Focus • Business • Planning • Programs • Enablement • Support

All 37 Pragmatic activities mapped to the six-stage agentic funnel.

THE 10X THESIS

A PMM who automates 20 hours a week of Cluster One work and redirects that time into Cluster Two and Three activities will outperform one still manually updating battlecards — not by 20%, but by a factor that justifies the title of

this curriculum.

Key Takeaways

- The agentic shift is a structural transformation, not a toolkit upgrade
- Buyer behavior has already changed — AI agents compress research from weeks to hours
- Most PMM content is invisible to agents (the Visibility Gap)
- The Pragmatic 37 cluster into: **Automated, Augmented, Elevated**
- The PMM who frees Cluster One hours to invest in Cluster Three operates at a different level
