

The Future of PMM

Executive Summary — Pilot Program Results & Recommendations

Prepared for Brenda Brown · September 2026 · Chris O'Hara

AI didn't just give PMMs new tools — it inserted itself between us and our buyers. The intermediary became intelligent, and that changes how product marketing has to operate.

1. Original Purpose & Intent

The Future of PMM was created to answer a question that kept coming up across PMM teams: **"How should we adapt our skills and workflows for an AI-transformed world?"**

The intent was threefold:

- **Educate** — Build a structured curriculum that teaches PMMs how AI changes the buyer journey, content strategy, competitive intelligence, and core PMM deliverables
- **Experiment** — Test interactive AI labs that demonstrate what's possible when PMMs work alongside AI tools in their daily work
- **Validate** — Prove the concept with a small cohort before scaling to all SAP PMMs

Core Hypothesis: AI doesn't replace PMMs — it amplifies them. But only if PMMs develop the right skills and learn to collaborate with AI as a "co-worker," not just a tool.

2. What We Built

A 12-unit curriculum mapped directly to the Book of Work, plus three live AI labs where PMMs practice the skills instead of just reading about them.

12-Unit Curriculum

Unit	Topic	Book of Work Alignment
1	The AI Transformation	Foundation for all 11 BoW areas
2	AI & the Buyer Journey	01 Messaging, 06 Personas, 09 GTM
3	Content Strategy for AI	02 Storytelling, 04 Launch Narrative
4	Competitive Intelligence	03 Market Insights & Signal Synthesis
5	Messaging That Lands	01 Messaging & Positioning
6	Always-On Competitive	03 Market Insights, 07 Commercialization
7	Content for Two Audiences	02 Storytelling, 08 Launch & Disclosure
8	GEO & AI Visibility	09 GTM & Field Readiness
9	Segmentation & Sizing	06 Customer Profiles/Personas
10	Buyer Personas & Journeys	06 Personas, 07 Commercialization
11	Skills That Survive	Strategic judgment across all BoW areas
12	Capstone Assessment	Comprehensive validation

Interactive AI Labs

Lab	Capability	Book of Work Area
Messaging Lab	AI-assisted message development & testing	01, 02, 04
BattleCoach	Competitive positioning sparring partner	03, 07
GEO Visibility Lab	Multi-LLM brand visibility scoring	09
10x PMM Scorecard	Self-assessment against AI-era competencies	All
Cognitive Style Assessment	Learning preference diagnostic	All

Supporting Content

- **30 weekly newsletters** — AI + PMM trends, news, and practical guidance
- **200+ daily digests** — Curated AI/marketing intelligence
- **Thought Leader profiles** — John Koblinsky on Evidence Assurance
- **Office Hours recordings** — Live Q&A sessions

3. The Results

181 PMMs enrolled. 73% completed. The most consistent finding wasn't about efficiency — it was a mindset shift from "AI as tool" to "AI as co-worker."

QUIZ ATTEMPTS

73%

PASS RATE

53

SURVEY RESPONSES

Engagement Distribution

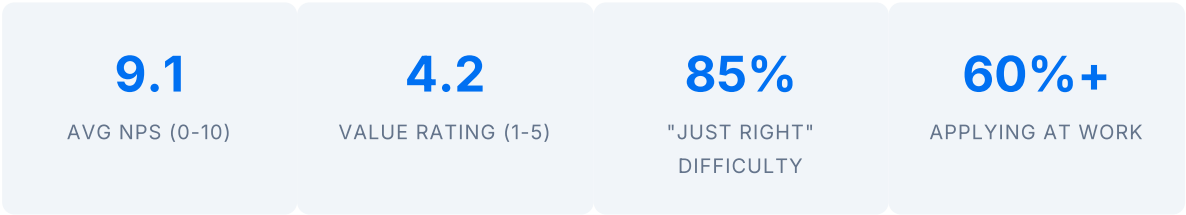

Completion Level	Users
Completed 10+ units	7 learners
Completed 5-9 units	12 learners
Completed 1-4 units	45+ learners
Registered, not started	~100 learners

Top Performers

Rank	Learner	Units Completed
	Corrie Birkeness	11
	Venkata Giduthuri, Matthew Montgomery, Tobin Sydneysmith, Dante Ricci	10
	Axel Schuller	12 (completed after final newsletter)

4. What They Learned

Survey data from 53 respondents shows strong efficacy across every component — but the qualitative feedback tells the real story.

What Learners Said They Gained

- "I need to change my overall mindset of how to use AI from intern to co-worker."
- "What it means to be a 10x PMM"
- "How AI should be used to optimize workflows throughout the funnel and how PMMs need to fundamentally rethink their roles."
- "How to structure PMM content so AI agents can parse it, quote it, and cite it accurately."
- "Where to start with AI and where to augment/check"
- "Understanding GEO — SEO does not ensure returns in AI results."

Component Ratings (1-5 scale)

Component	Avg Rating
Newsletter	4.2
Content Quality	4.1
Assessments	4.3
Labs	4.3
Presentation	4.1

Key Finding: The curriculum successfully shifted mental models. Learners consistently cited the "AI as co-worker" framework and GEO concepts as actionable insights they're applying to their work.

5. Book of Work Alignment

Every unit ties to a specific capability area. This isn't adjacent learning — it's direct preparation

for the work PMMs are already accountable for.

PMM LEADS (11 Areas)	PMM SUPPORTS (8 Areas)
✓ Messaging & Positioning ✓ Category Storytelling ✓ Market Insights ✓ Launch Narrative ✓ Adoption Strategy ✓ Customer Personas ✓ Commercialization ✓ Launch & Disclosure ✓ GTM & Field Readiness ✓ Demo ✓ Customer Reference	✓ Marketing Planning ✓ Campaign Execution ✓ Press & Communications ✓ Partner & ISV ✓ Pricing Communication ✓ Community ✓ Learning Journeys ✓ Customer Journey Content

The interactive labs demonstrated what's possible when PMMs have AI assistance embedded in their workflows. Each lab represents a prototype for a broader capability:

Current Lab Capabilities

Messaging Lab	Draft and refine positioning statements, value props, and persona-specific messaging with AI feedback
BattleCoach	Practice competitive positioning against objections; AI plays the role of a skeptical buyer or competitor
GEO Visibility Lab	Query multiple LLMs to see how SAP products appear in AI-generated recommendations

Vision: PMM Co-Pilot on SAP Infrastructure

The Opportunity: Transform these experimental labs into production-ready AI agents that operate within SAP's existing AI infrastructure (Joule, SAP AI Core) with proper guardrails around PMM work.

A PMM Co-Pilot could automate and assist across the entire Book of Work — both areas PMM leads and areas PMM supports:

PMM Leads / Accountable (11 Areas)

01 Messaging & Positioning	Draft positioning frameworks, test message variants, ensure consistency across assets
02 Category Storytelling	Generate use-case narratives, adapt stories for different personas, maintain POV consistency
03 Market Insights	Synthesize competitive signals, analyst reports, and field feedback into actionable recommendations
04 Launch Narrative	Draft and refine launch briefs, ensure alignment with approved messaging
05 Adoption Strategy	Analyze adoption patterns, recommend expansion plays based on customer data
06 Customer Personas	Build and maintain dynamic personas that evolve with real buyer behavior
07 Commercialization	Connect value narratives to pricing, packaging decisions
08 Launch & Disclosure	Manage tiering, lock messaging, prepare readiness checklists
09 GTM & Field Readiness	Generate sales enablement assets, objection handling guides, competitive quick-cards
10 Demo	Create demo scripts, prioritize use-case flows for specific buyer segments
11 Customer Reference	Match reference customers to prospect needs, draft reference request outreach

PMM Partners / Supports (8 Areas)

Where PMM shapes strategy, messaging, or requirements while partner teams own execution:

01 Marketing Planning	Generate audience insights, narrative inputs, and portfolio context for Integrated Marketing
02 Campaign Execution	Provide approved messaging, buyer context, launch timing inputs to Digital and Field Marketing
03 Press & Communications	Draft product truth documents, spokesperson context, and narrative guardrails for PR/Comms
04 Partner & ISV	Generate partner-facing positioning, business value content, and launch context
05 Pricing Communication	Create buyer-facing value narratives, ROI framing, and packaging translation
06 Community	Define community strategy, audience priorities, and customer community direction
07 Learning Journeys	Provide messaging and role-based content strategy for Learning teams
08 Customer Journey Content	Define what to say, to which audiences, and why — Integrated Marketing packages at scale

Guardrails Required:

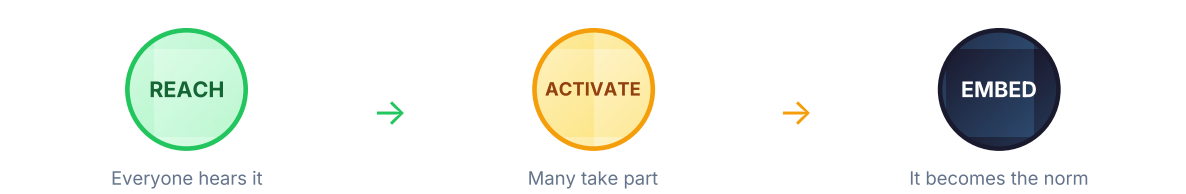

- Operates only on approved messaging and brand guidelines
- Human review required before external publication
- Audit trail for all AI-generated content
- Integration with existing content management and approval workflows

6. What's Next

H2 is about scaling what worked: broader reach, deeper activation, embedded workflows that make AI-native PMM the default, not the exception.

Context: The H2 Engagement Plan

The Future of PMM pilot represents the "first Labs cohort" in the broader engagement strategy to reach 500 PMMs:

Stage	Goal	Activities
REACH	Everyone hears it	Quarterly all-hands, exec comms from Eric & Brenda, community hub as front door
ACTIVATE	Many take part	Learning journey + Labs, monthly AMAs & Spotlight Series, first playbooks in hand
EMBED	It becomes the norm	Playbooks used in daily work, champions network in every LoB, recognition & measured adoption

Measured the Whole Way: % of the 500 reached → % activated → % contributing — reported back each quarter.

Pilot Results Map to ACTIVATE Metrics

Metric	Pilot Result	Scales To
Reached (registered)	181 users	500 PMMs
Activated (1+ units)	~80 learners (44%)	Target: 50%+ of 500
Contributing (completed curriculum)	7+ learners	Champions network in every LoB

Pilot Outcome: The "first Labs cohort" validated the model with 9.1 NPS and 73% pass rate. Ready to scale from ACTIVATE to EMBED across the full 500.

Immediate: Site Migration

A complete [Migration Guide](#) has been prepared documenting:

- Current architecture (Netlify, Supabase, Resend, AI APIs)
- Database schema and data export procedures
- SAP BTP equivalents (HANA Cloud, SAP IAS, Cloud Foundry)
- Phase-by-phase migration plan

Migration Status: Documentation complete. Ready to hand off to IT for infrastructure provisioning.

In Progress: SuccessFactors Learning

The 12-unit curriculum is being adapted for SuccessFactors Learning to enable:

- Formal completion tracking and certification
- Integration with employee learning records
- Scalable delivery to all SAP PMMs globally
- Manager visibility into team skill development

Phase 03: Embed — Book of Work Integration

As the organization moves to Phase 03, the ultimate vision is a PMM operating environment where:

1. **Learning** — PMMs complete the curriculum to build foundational AI-era skills
2. **Tools** — AI agents assist with each of the 19 Book of Work areas (11 lead + 8 support)
3. **Guardrails** — All AI-assisted work operates within approved guidelines and audit trails
4. **Measurement** — Track engagement and contribution across the 500 PMMs

The Book of Work Comes Alive: Instead of static process documentation, the Book of Work becomes an interactive system — with AI agents that help PMMs execute each area while maintaining quality standards and strategic alignment. Playbooks ship. Recognition programs activate. Engagement is measured at every step.

The Bottom Line

The pilot proved the model. Now it's time to scale.

The Future of PMM pilot achieved its objectives:

- **Validated demand** — 181 users registered, 53 provided feedback, NPS of 9.1
- **Proved the curriculum** — 73% pass rate, strong qualitative feedback on learning outcomes
- **Demonstrated lab potential** — Interactive AI tools showed what PMM co-pilots could enable
- **Prepared for scale** — Migration guide complete, SuccessFactors integration in progress

The next phase is clear: move the curriculum to corporate infrastructure, integrate with SuccessFactors for formal learning paths, and explore how the lab prototypes can evolve into production AI agents that make the Book of Work actionable across all SAP PMM teams.

Thank you for your support of this initiative.
